Harrison, New Jersey

APPLICATION NOTE No.113
April 8, 1941

PRECAUTION IN ASSEMBLY OF RECEIVERS
EMPLOYING BUTTON-BASE TUBES

The center hole in sockets designed for the button base, as used on miniature tubes, provides for the possibility that tube types employing the button base may be manufactured with the exhaust-tube tip at the base end. For this reason, it is recommended that in equipment employing such tube types, no material be permitted to obstruct the socket hole.
