

**Ganti's 811A Amplifier**  
 by Sridhar Gantimahapatruni  
 based on a Nobu Shisheido design  
 schematic drawn by John Atwood  
 rev 1.1  
 4/5/03

*Voltages and currents are approximate.*

- T1 - 1:1 Interstage transformer, 30mA max DC (Electra-Print custom)
- T2 - 1:0.7 Interstage transformer, 60mA max DC (Electra-Print custom)
- T3 - 4.8K Output transformer, 110mA max DC, (One Electron UBT-2)
- T4 - One Electron BFT-1B
- T5 - 115V-to-12.6V transformer, connected in reverse.
- T6 - Hammond 166N8

*Adjust for 100mA 811A plate current*
