# EIA SOURCE CODE AND DATE CODE

## 1. What is the EIA Source Code?

It is a numeric symbol, assigned and registered by EIA headquarters, which may be stamped or marked on any or all products to identify the production source or the vendor assuming product responsibility.

The EIA code, in addition, provides for adding numerals to the source code symbol to identify the year and week of production.

## 2. How does the date code work?

In addition to a source code, it may be desired to identify the date of production. This can be done by adding, following a hyphen (-), the last two digits of the production year plus the number of the week of that year.

A hypothetical example of the application of the EIA date code to the source code follows: Say a company is assigned the source code symbol 112. To this is added two digits for the year—such as “62” for the current year or “63” for 1963—and another two digits for the week of the year. Thus the combined source and date codes might be, in this case,

**112-6221**

which would represent the company's source number “112”, plus “62” for 1962, the production year, and “21” for the week of May 20-26, the production week. For convenience in identifying the week, tables on pages 21 and 22 give the numbers of each week in both 1962 and 1963.

If a component manufacturer is unable to use the four-digit date code, an alternate three-digit code may be used by taking only the last digit of the year. The example above would then become

**112-221**

**3. To whom is this EIA service available?**

To all United States manufacturers of radio-television and electronic equipment or components. This service is extended to all EIA members without charge. For non-members an annual registration service fee of \$10 is charged.
