

Sodion

A New Era in Radio

That, in the fullest sense of the word, is what the SODION TUBE means to everybody who owns or expects to own a receiving set.

Based on an entirely new principle—utilizing the highly valuable and peculiar properties of the sodium ion

The Sodion Tube

(*Sodium - Ion*)

is many times more sensitive and produces far stronger signals than any detector yet developed. Due to the fact that it cannot be made to oscillate, it not only eliminates any semblance of whistles or beat-note howls in your own reception, *but does not interfere with the reception of others.*

At a meeting of the Institute of Radio Engineers where this tube was being demonstrated, a prominent Scientist and Radio Engineer in contrasting this with the action of the ordinary detector, dubbed it

"THE GOLDEN RULE TUBE"

Stable and uniform in operation. Runs for hours without adjustment. Has no grid. No grid leak or grid condenser are required. Crystal tone reception. Unusually sensitive to weak signals. Operates on dry cells or storage batteries.

Bulletin A-100 describing this tube upon request.
