

# Presenting The RCA-838 Transmitting Tube

*Amateurs' and Experimenters' Net Price, \$18.00*

The new RCA-838 offers such outstanding advantages as:

- Zero-bias operation as a Class B Modulator; output (2 tubes) approximately 260 watts with less than 5% distortion.
- Suitable for use in Class B and Class C radio-frequency Service; approximate output in keyed Class C Service, 130 watts.
- Well adapted for grid-leak-bias operation in Class C Service, since plate current drops to safe value if grid excitation is accidentally removed.
- May be used at maximum ratings for frequencies up to 30 megacycles.
- Has maximum plate dissipation rating of 100 watts.

Your RCA deForest Distributor can supply you with the new RCA-838.
