

"Weights out right capacity as accurately as the apothecary weighs out a precious drug."

A. C. L.

TECHNICAL men were quick to appreciate Sangamo condensers in intermediate capacities. One engineer, well known to readers of radio publications—Austin C. Lescarbourea—sends us the following characteristic comment, which is published with his consent:

"In my laboratory we develop new circuits and variations of old circuits, publishing the results in radio magazines. Needless to say, we are using and specifying Sangamo condensers throughout. In my opinion there is no other fixed condenser that can compare with the Sangamo in accuracy, permanent capacity value, neatness and handiness.

"The Sangamo condenser weighs out just the right capacity as the apothecary weighs out a precious drug."

SANGAMO

Mica Condensers

are made in 34 sizes, ranging from 0.00004 mfd. to 0.012 mfd. Sangamo Wound Condensers are ready in capacities from 1/10 mfd. to 4 mfd.; Series A guaranteed for continuous operation at 250 volts AC, 400 volts DC; Series B guaranteed at 500 volts AC, 1000 volts DC; also 12 and 14 mfd. blocks.

APPROVED

By the critical amateur, TECO products are already world-famous. TECO is exclusively devoted to "ham" business. Our object is to give you just what you want at an economical price. May we serve you?

TECO SHORT-WAVE RECEIVER

Designed by amateurs, this receiver is laboratory tested and made of the best parts obtainable. The great care exercised in its construction insures efficient operation over the entire tuning range of 10 to 200 meters (1500 to 30,000 kilocycles). **SPECIAL SALE PRICE, \$27.50.**

TECO SHORT-WAVE TRANSMITTER

Built to the highest of standards. Has all necessary high voltage filters and chokes. A milliammeter and a hot wire meter are mounted on the panel. Two sockets in parallel give the operator complete control of the output. Tuning condensers are high voltage Cardwells. **SPECIAL SALE PRICE, \$39.50.**
