

CONNECTICUT RADIO

THE NEW ELECTRON TUBE For Radio Detection

The interest shown by the radio world in the new CONNECTICUT Electron Tube so far exceeded our expectations that it became necessary for us to arrange for production on a much larger scale than originally planned. This has meant unavoidable delay in deliveries.

We have taken advantage of the delay, however, to make certain modifications in the operating design of the Detector assembly. The principle of the tube and its sensitiveness remain unchanged; but the new assembly will enable even the less skillful operators to obtain superior results.

The delay will therefore work to the benefit of users of the CONNECTICUT Tube. Watch for announcement of delivery dates in the next issue of QST.
