

A NEW ERA IN RADIO

The Golden Rule Tube

The discovery of the principle upon which the Sodian Tube was developed marks a new and better Era in Radio.

The tube itself is different from any you have ever known.

Different in principle—different in operation and different in results.

As its name implies, it makes such effective use of the peculiar properties of the sodium ion that there is no need of regeneration to build up the strength of your reception.

The fact that it does not oscillate not only eliminates all semblance of whistles and howls in your own reception, but makes it impossible for you to interfere with the reception of others. It is the practical application of the Golden Rule to Radio.

Crystal tone reception.

Unusually sensitive to weak signals.

Stable and uniform in operation.

Runs for hours without adjustment.

Operates on dry cells or storage battery.
