

Now... *Hygrade Sylvania* Announces

A Complete Electronics Department

■ full production facilities ■ leading electronics engineers

FOR more than 30 years, the Hygrade Sylvania Corporation, and its predecessors have supplied the electric light industry with standard lamps of highest quality and uniformity. And since earliest days of radio, this company has pioneered in the development of radio tubes.

Now, with the formation of its new Electronics Department, the Hygrade Sylvania Corporation expands to meet the newer demands of electronics. In addition to lamp bulbs and radio set tubes, this company now produces radio transmitters, transmitter tubes, special receivers, industrial tubes and custom-built electronic devices of every specialized nature.

A technical staff composed of William J. Barkley, General Manager; D. F. Replogle, Chief Engineer; Victor O. Allen, Assistant Chief Engineer; and 22 other electronics engineers and executives, all formerly associated with the DeForest Radio Company; a complete research laboratory fully equipped for any purpose required in the electronic art; and ample production facilities insured by a new fully equipped plant where all electronics work will be coordinated—all of these factors add to the Hygrade Sylvania resources the same skill and knowledge responsible for today's most important commercial applications of electronics.

The Hygrade Sylvania Corporation invites you to avail yourself of its technical experience, and vast production and research facilities. For consultations, write to:
