

# THE AMAZING NEW 5000 HOUR ELKON RECTIFIER FOR "B" ELIMINATORS

NEW, UNIQUE!

REVOLUTIONARY!

SOLID, DRY!

NOT A TUBE!

## ONLY 200,000 AVAILABLE THIS SEASON

JUST as the Elkon dry, low-voltage rectifier revolutionized the design of chargers and "A" Eliminators, the new Elkon "B" type Rectifier will revolutionize the design of "B" Eliminators.

The Elkon EBH Rectifier plugs into any Eliminator using the former standard "B" rectifier tube. Simply take out the fragile 1,000 hour tube—plug in the husky Elkon EBH and the change is made. No changes in wiring—no adjustments.

It is sturdy, solid, dry—has none of the frailties of a tube—not affected by accidental overloads or line surges. It is self healing. The power is smoother, quieter.

From the orders already received from dealers and jobbers in all parts of the country, we know that we will be tremendously oversold this season—only 200,000 of these revolutionary rectifiers will be available.

The elaborate manufacturing, testing and aging equipment necessary to produce the Elkon EBH Rectifier precludes any greater production the first year.

Look for the Red and Yellow display carton on your dealer's shelves. The new EBH is packed in a metal can.

Buy one from your dealer today! Plug it into your "B" Eliminator—Trouble free for at least 5,000 hours!
