

CONNECTICUT RADIO

THE NEW ELECTRON TUBE

Detector and Self Amplifier

(Fully protected by patents in the principal countries throughout the world)

THIS Tube, the Sensation of the Chicago Radio Show, is new in principle, and in operation. Hence it offers these notable advantages:

No B Batteries

No Tickler

No Grid Leaks

No Filament Adjustment

High Selectivity

Extreme Sensitiveness

(Equal to one stage of amplification)

Much longer life

Uniformity of Tubes

(All equally good)

It represents the result of over four years exhaustive research, the study of nearly 2000 tubes, with complete records of the characteristics of each one. It has had thorough tests in our own research laboratories, and months of continuous operating use.

Only after gaining this full knowledge of its characteristics, its remarkable possibilities, and its practical usefulness, are we ready to offer it to radio workers, as a forward step in a great field.

Made up in the complete CONNECTICUT Detector Set at \$35.00; Detector Unit alone, \$12.00; Tubes (for replacement) \$3.50.

We shall be glad to furnish you with further information on request. Or ask your dealer to show you the set.
