this typical  
letter!

About 2 yrs ago I bought 2 S-Tubes which you now rate  
 "old style". Have had some wonderful results with these.  
 They are still in use.  
 You claimed they'd rectify up to 750 V. AC. They sure  
 do and THEN SOME. Am sending complete report how I got  
 far more out of them.  
 Pure DC on straight CW and phone. Reported in Ealing,  
 New Zealand 7500 to 8000 mi from here; WAP; Alaska (3 times)  
 Hawaii (4 times); Cuba, BGT; ship in Panama Canal; 47  
 states; and all Canadian Districts but one, London, Eng.  
 Any piece of apparatus like the S-Tube deserves more  
 than honorable mention.

S-TUBE  
 Type 4000-1  
 Price \$10.00

## THE NEW S-TUBE

Co-operating with leading amateurs, we made certain mechanical improvements to the AMRAD S-Tube in order to meet still further amateur requirements for "the Rectifier Without a Filament." These improvements result in:—

1. **Increased mechanical strength**—The internal elements are now so supported that breakage in handling is minimized.
2. **Improved looks**—The shape is now tubular which further facilitates handling as well as improving appearance.
3. **Increased dielectric**—The large Mogul base provides greater dielectric strength resulting in increased efficiency.

Improved production facilities are now materially reducing the existing shortage of S-Tubes. If your dealer cannot supply you, amateurs may send remittance direct to us and we will make promptest possible delivery.

From time to time we have published unsolicited letters from amateurs praising the S-Tube. Many of these refer to the first type. Later, the ratings were increased and even more favorable comments were received. Now, with the mechanical improvements above noted, still greater value is offered to those desiring an economical, dependable, source of d. c. plate supply or for use in charging storage B Batteries.

Send for Bulletin J-2. This describes type 4000 which is identical with new type 4000-1 illustrated, except for the improvements. (New Bulletin is not quite ready).
