Insist on the name AUDIO TRON on every tube you purchase. Fully guaranteed by the AUDIO TRON Mfg. Co. (Read the guaranty below).

**Your last chance for an AUDIO TRON <sup>double filament</sup> DETECTOR**

Manufacturing reasons make it impossible to continue the present hand-made AUDIO TRON.

This type has a double filament of special thorium tungsten and the operating life is over 2,000 hours. No special socket is required. The electrical and mechanical dimensions result in a heavy plate current and corresponding signal strength. Plate voltage under 40.

The few thousand that will still be produced, however, will be of the same standard of excellence that has characterized every AUDIO-TRON.

Already recognized as the most sensitive detector on the market, these few that will remain, with all re-

strictions on amateur use lifted, are undoubtedly the greatest opportunity ever offered to amateur radio operators.
