

# COMING THRU

IN KEEPING with well known initiative, plus the ability to create and produce superior tubes, the UNITED organization is "delivering the goods."

Fifteen types of UNITED transmitting tubes, all the last word in design, are now available for immediate shipment. They are as follows:

311	945	930	941	966A
311C	952	930B	942	972
911CH	303A	310	966	972A

Other, higher power broadcast types are coming.

UNITED transmitting tubes have already attained widespread usage, having been purchased in large quantities by various departments of the U. S. Government, as well as by Broadcasting Stations and Amateurs the world over.

*Ask your distributor to tell you more about UNITED transmitting tubes*
