

Now! An Even Greater **RCA-807**

HIGHER RATINGS IMPROVED PERFORMANCE MORE OUTPUT

The maximum rated plate voltage is now increased to 600 volts for Class C telegraph service. This higher rating, made possible by a new electrode structure using ceramic insulation to isolate the plate, provides for a 50% greater input and an increasingly larger output

New shielding gives greater stability and further lessens need for neutralization in those borderline cases. With the new 807, it is easier to avoid parasitics and self-oscillation.

These improvements in the RCA-807 are examples of the consistent RCA policy of improving existing tube types as well as introducing advanced new designs. The 807 is now an even better tube, yet the price remains the same... \$3.90 amateur's net.
